SECTION 11 – TOXICOLOGICAL INFORMATION

Human Dermal Exposure: Regardless of concentration, the severity of damage and extent of its irreversibility increases with length of contact time. Prolonged contact even with diluted product can cause a high degree of skin damage.

SECTION 12 – ECOLOGICAL INFORMATION

There is limited information available on the environmental fate and effects of this material. The primary environmental effects of its release is the impact of high pH on aquatic and terrestrial species. Aquatic organisms become increasingly stressed as the pH exceeds 9, with many species being intolerant. Spills would represent a burn risk for wildlife. Due care should be taken.

SECTION 13 – DISPOSAL CONSIDERATIONS

Dispose of all waste and contaminated equipment in accordance with all applicable federal, state and local health and environmental regulations.

SECTION 14 – TRANSPORT INFORMATION

Not regulated by D.O.T. Class 55.

SECTION 15 – REGULATORY INFORMATION

We request that you make all information in this Material Safety Data Sheet available to all employees.
